

Avoiding Investment Strategy Flame-outs

Why do investment/trading strategies that test well on historical data flame out when put to actual use? Are there steps investors can take to improve the odds that strategies they develop will perform as tested? This book draws upon reviews of hundreds of academic and practitioner studies that seek to predict asset prices and exploit the predictions. It focuses on widespread weaknesses and limitations in these studies to help investors: (1) avoid or mitigate the weaknesses in developing their own strategies; and, (2) perform due diligence on strategies offered by others. *Avoiding Investment Strategy Flame-outs* is the product of years of research analysis by Steve LeCompte, Editor of CXO Advisory, a stock market research repository for thousands of individual, institutional, and academic investing professionals.
