

Numerical Methods in Finance (Gerad 25th Anniversary)

GERAD celebrates this year its 25th anniversary. The Center was created in 1980 by a small group of professors and researchers of HEC Montreal, McGill University and of the Ecole Polytechnique de Montreal. GERAD's activities achieved sufficient scope to justify its conversion in June 1988 into a Joint Research Centre of HEC Montreal, the Ecole Polytechnique de Montreal and McGill University. In 1996, the Université du Québec à Montreal joined these three institutions. GERAD has fifty members (professors), more than twenty research associates and post doctoral students and more than two hundred master and Ph.D. students. GERAD is a multi-university center and a vital forum for the development of operations research. Its mission is defined around the following four complementary objectives: The original and expert contribution to all research fields in GERAD's area of expertise; The dissemination of research results in the best scientific outlets as well as in the society in general; The training of graduate students and post doctoral researchers; The contribution to the economic community by solving important problems and providing transferable tools.

Numerical methods in finance / edited by Michèle Breton, Hatem Ben-Ameur. Series Title: GERAD 25th anniversary series 9. Identifier: (ISBN)0387251189 Computational Statistics & Data Analysis, 76, 291300, 2014 BibTeX reference .
