Over 570 happy buyers to date (between Amazon, Bitmit, and eBay)!\*\* So, you just bought that new Radeon 7950 card for Litecoin mining.... What settings are the best? How can you know for sure? How many hours will you sit in front of your rig, waiting for it to lock up or overheat? Are you sick of spending hours in trial and error to find the best stable script mining settings for your 7950?? I am a veteran pc tech, an avid Bitcoin enthusiast, and I have been building miners for the past 2 years. It took a large amount of time and effort to optimize my 5x 7950 rigs to put out 620+ Kh/s each. Im going to save you that hassle. I spent hours working out the very best settings for these cards. Buy my settings and you will get full instructions for how to get the most out of your 7950 rig. This manual will give you all instructions needed to get 620+ KH/s out of your cards. These settings only require air cooling and draw 195 watts for each card. A quad card system will draw 935 watts at the wall, and be hashing at 620+ KH/s on each card. Your digital purchase will include the following settings: Mid range 605 KH/s High Performance 620 KH/s Ultra High Performance 635 KH/s These settings only have 1% stales or lower (depending on your pool). They work with many Radeon 7950s (Sapphire, Gigabyte, HIS, MSI, etc.) and with any scrypt based crypto-currency (Litecoin, Dogecoin, etc.) Time is money in crypto-currency mining. Save yourself days/weeks of frustration and get your miners working at top output! Feedback from buyers (on other sites): If your just

getting into mining or a seasoned pro youll want this. Well written - winningbidder Helped get me from 1200+ WU to 1300+ WU...
