Some of the ideas contained in this book may seem foreign, or even counter intuitive to you. You think to yourself, Ive been doing all right up to this point, why should I change. Do not be afraid of trying something different. Its a new world out there, technologically speaking, and innovations are happening every day. If you do not continue to update your skill set, and strive to improve your marketing techniques, it will not be long until you find yourself outdated and outgunned by financial advisors who are constantly innovating. So, take a chance. Nothing says that you need to implement every idea in this book right away. You can start with one tweak to your marketing program and build on that foundation.
